Digital Document Camera With Integrated PC Graphics Writing TABLET

YOKOGAWA DMC-27XT

KEY FEATURES & BENEFITS

- Sleek, executive-design suitable for corporate boardrooms or university lecture halls
- Integrated XGA graphics writing tablet for real-time annotation of documents, and real-time annotation of computer images (including PowerPoint™ images)
- 850,000 pixels and XGA output resolution for clearer viewing of document text. Uses 1/3" progressive scan CCD camera, with 10X zoom
- LCD preview monitor included, provides ease of use when positioning documents
- Totally open stage (no side lamps in the way), makes it easy to move documents or 3-D objects on and off the stage
- XGA input and output, so computer can be connected directly to the document camera
- ISO 9001 and ISO 14001 certified (for environmental friendliness)
- Tablet provides computer graphics annotation, document annotation, and electronic Writeboard™, and electronic Chalkless™ board functions in one unit
- Folds down completely flat. Optional carry bag available
- \$3,995 retail price (including tablet)

ATTACHABLE DIGITIZER TABLET

- All electronics & software built-in. Connecting the writing tablet to the DMC-27XT is plug and draw. No black boxes to hook up. No software to load.
- 4 drawing styles: freestyle rendering, circles/ovals, straight line, underline. Easily make real time annotations to documents, 3-D objects and computer images that are displayed – to increase audience attention and retention
- 8 colors and 3 line widths
- Electronic WriteBoard™ and electronic Chalkless™ green board functions. Simple, easy to use, electronic boarding capability

Combine with a YOKOGAWA projector for bundled savings.
